Summary

CS graduate (UIC, 2025) specializing in Software Engineering with hands-on experience building Android apps, RESTful APIs, and full-stack web projects. Proficient in Python, C++, SQL, and JavaScript. Skilled in Agile/Scrum environments, collaborative team settings, and delivering user-tested software.

EDUCATION

University of Illinois at Chicago (UIC)

May 2025

Bachelor of Science in Computer Science with a Concentration in Software Engineering

Graduating Cum Laude

Major GPA: 3.82/4.00

Relevant Coursework: Data Structures, Algorithms, Software Engineering, Systems Programming, Database Systems, UI Design, Software Design Patterns

SKILLS

Languages: Python, SQL, C++, C, Ruby, JavaScript, Java, TypeScript, Kotlin, C#, F#, HTML, CSS

Frameworks: React, Node.js, Android Jetpack Compose, Unity, JUnit

Databases: MySQL, Firebase, MongoDB

Tools: Git, GitHub, JIRA, MySQL Workbench, Android Studio, REST APIs, Postman

Methodologies: Agile (Scrum), OOP, RESTful API Design, Software Design Patterns

Certifications: Microsoft Certified: Azure Fundamentals (2024)

WORK EXPERIENCE

Datacenter Technician III (Contract through Insight Global) – Microsoft

July 2025 - Present

- Maintained and deployed datacenter hardware, including servers, switches, racks, and storage devices across large-scale infrastructure to ensure uptime and SLA compliance.
- Diagnosed and resolved hardware and network connectivity issues across 100+ devices, minimizing service disruption.
- Created cable maps documenting physical end-to-end network connections.

IT Intern – John B. Sanfilippo & Son, Inc.

May 2023 - August 2023

- Worked in multiple areas of the IT Department. Hands-on training and experience in configuring and installing electronic devices, troubleshooting the computer system, and various software.
- Collaborated with 5+ IT specialists to develop a comprehensive understanding of technology infrastructure and maintenance best practices.

Mobile Application Developer Intern - University of Illinois at Chicago

June 2022 - August 2022

- Developed 3+ Android applications using Kotlin and Android Jetpack Compose, delivering functional utility and game prototypes across a 10-week program.
- Developed a diverse portfolio of utility and game applications to build hands-on experience in mobile development.

PROJECTS

Rare Task Reminder | HTML, CSS, JavaScript

Jan 2025 – May 2025

- Led UX design and frontend development of a homeowner maintenance web app; conducted 3 rounds of user testing to iterate and validate prototypes before final release.

SQUEEZE! Financial Literacy Game | Unity, C#, Jira

Jan 2025 – May 2025

- Collaborated in an Agile/Scrum team to design and ship a 2D Unity educational simulation game with inventory systems, customer behavior logic, and financial analytics.

Database Systems | Node.js, MySQL, MongoDB, GCP

Nov 2024

- Developed and deployed a Node.js RESTful API on a GCP Virtual Machine, integrating MySQL and MongoDB databases using secure, parameterized queries to get user's desired outputs.

Money Management Project | Android Studio, Kotlin, Firebase

Aug 2024 – Nov 2024

- Built a full-featured Android money management app using Android Studio and Firebase Realtime Database, implementing real-time data sync for persistent user financial records across sessions.
